1.1 Programme derivation

Switzerland is divided into 26 cantons of which everyone represents a SOTA-Region. All cantons do have the same points rationing scheme.

To qualify for a summit it has to meet the following requirements:

- The summit must be listed in the Swiss Map 50 with a corresponding Name
- The summit must be elevated at least 150m from it's surroundings
- In the case of doubt the Management Team will decide whether the Summit will be added to the list

1.2 General information

The summit database does not claim to be completed and can only be changed by the acceptance of the management team.

The database is not complete because of the huge amount of Swiss mountains, but it contains the top summits per region. Activators are asked to submit claims for further summits which can be submitted to the regional manager or to the mountain manager guido.zala@bluewin.ch

If the Summit meets the SOTA and SOTA-Schweiz requirements it will be indicated and added to the list.

Summits cannot be counted for points until a reference number has been allocated by the association manager.

1.3 Maps

.The coordinates and elevations in the following list correspond with the data of the Federal Office of Topography. The maps are available on DVD by the name "SwissMap 50".

The list were kindly provided by <http://www.berge.ch> and <http://www.romankoch.ch/gipfel/> which contain useful information's for travellers too.

1.4 Disclaimer

Hiking, mountain and rock climbing are potentially dangerous activities. The SOTA management team and their associates assume no responsibility for accidents. Every SOTA participant does so at his own risk and responsibility. Every SOTA participant must decide for himself, if he has the necessary ability to reach his destination. He must be informed of the difficulty level of the tour before starting out. The listing of a summit in the reference does not mean that it is easy to reach.

1.5 *Final words*

As a guest in the nature, everyone can choose his own way, speed and rhythm. This freedom is of value. But it is not boundless, because it implies responsibility for fellow man and nature.

The natural habitat is rich and manifold. Many plants and animals are bound to a narrow habitat and react sensitive to interferences.

Our responsibility to the nature and the environment are not only bounded to the tour itself. Also the before and after, the planning, the material, the choice of means of transport, the accommodation and waste disposal are included.
