

SOTA Chasing with Logger 32

US English menus loaded
DX Spot buffer size set to 300

Logger32

Version 3.50.262

Copyright 2001-2016 Robert C. Furzer.

Loading previous QSOs window

All rights reserved

- Free of charge and downloadable via the internet
 - Provides a direct connection via telnet to the MMOFMF SOTA Cluster
- Provides the ability to record SOTA References Chaser + Activator / S2S
- Provides the ability to export an ADIF file for conversion to CSV for the SOTA database

To use the MM0FMF SOTA Cluster within Logger 32 you need to configure a connection to the remote host:

elgur.dtdns.net

the port number is

7300

this is done in the
Logger 32

“Set up remote hosts”
Window – this facility
can be used with
other software not
just Logger 32!

```
