## 2.1 Division of regions

For political purposes, Switzerland is divided into 26 cantons. Every canton with a valid summit is considered a SOTA region. Every canton uses the same point system.

If a mountain's summit is physically shared among multiple cantons, it is assigned to the smallest involved canton.

For the definition of a summit, the following criteria apply:

- The summit must rise above its surroundings ("topographical prominence") on all sides by 150m.
- In case of doubt, the Management Team takes the final decision if a summit may be included in the list.

## 2.2 General information

Starting with ARM v2.1, we believe all possible summits are now listed in the summit tables. Despite our very best efforts, we make no claims that the summit list is absolutely correct. For summits that nonetheless might still be missing, an application can be made with the appropriate Regional Manager or the Summit Manager ([guido.zala@bluewin.ch](mailto:guido.zala@bluewin.ch)). If the summit meets the SOTA criteria, it will be assigned a reference number and added to the summit list as soon as possible.

For summits not yet included in the list, no points can be claimed until they have been added.

## 2.3 Map resources

The coordinates and elevations in the following lists correspond to information from the mapping program issued by the Swiss Federal Office of Topography. The maps can be examined at

<http://map.geo.admin.ch/?lang=de&X=190000.00&Y=660000.00&zoom=1&topic=ech&bgLayer=ch.swisstopo.pixelkarte-farbe>.

The summit lists were made available to us through the friendly assistance of the European Prominence Group, which considerably helped reduce the effort needed to assemble the lists.

#### **2.4 *Disclaimer***

Hiking, mountain and rock climbing are potentially dangerous activities. The SOTA management team and their associates assume no responsibility for accidents. Every SOTA participant does so at his own risk and responsibility. Every SOTA participant must decide for himself, if he has the necessary ability to reach his destination. He must be informed of the difficulty level of the tour before starting out. The listing of a summit in the reference does not mean that it is easy to reach.

#### **2.5 *Final words***

As a guest in nature, everyone can choose their own way, speed and rhythm. This freedom is of value. But it is not boundless, because it implies responsibility for fellow man and nature.

The natural habitat is rich and manifold. Many plants and animals are bound to a narrow habitat and are sensitive to interferences.

Our responsibility towards nature and the environment is not limited to the tour itself. The before and after, the planning, the material, the choice of means of transport, the accommodation and waste disposal are included.
